Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Response to Amendment

In response to the office action mailed on 11/1/05 the Applicant has amended claims 1,14,15,17,18, cancelled claims 2,4,7, and incorporated new claims 21-23. Currently claims 1,3,5,6,8-23 are pending.

Response to Arguments

1. Applicant arguments regarding restriction made between apparatus and method claims are persuasive. Therefore former restriction made has been withdrawn.
2. Applicant's arguments filed on 1/25/06, with respect to independent claim 1 have been fully considered and are persuasive. The rejection made to claims 1,3,5,6,8-14 has been withdrawn.
3. Applicant's arguments filed on 1/25/06 with respect to claim 15 have been fully considered but they are not persuasive. Farrell discloses every structural limitation cited in claim 15. Clarification of the structural limitation are provided below, see rejection made to claim 15 made under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Farrell US Patent No. 6,935,857 B1.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3743

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15, 18-21 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Farrell US Patent No. 6,935,857 B1

As to claim 15, Farrell in figures 1-5 discloses an oral appliance, a mouth guard or an orthodontic device, therefore capable of being used as an oral prophylaxis (protective treatment for teeth) comprising:

- An arched shaped occlusal plate (1)
- Maxillary buccal (97) and lingual (6) walls
- A dentition encasement material (3,4)
- A generally planar lower mandibular face (11)
- A labial force dispersal shield (wall of 17 in front of the mandibular incisor area 11)
- The mandibular face having a pair of molar zones in registration with mandibular molar teeth (molar areas are inherently located at the distal portion of 11 or proximal to 5 in fig.5)
- A pair of opposed peripheral framing braces, each framing brace extending downwardly from a buccal periphery of the mandibular face at the molar zone (see labeled fig. 5 attachment below)
- The dentition encasement material covers the molar zones and an incisor zones of the mandibular face (col.1 lines 55-65 and col.2 lines 1-30), the incisor zone being registered with the labial force dispersal shield (see fig.3)

Regarding “the buccal periphery of the mandibular face being free of downward extension intermediate the labial force dispersal shield and the framing braces” these structural limitations are disclosed by Farrell as stated above, and “to facilitate oral breathing” is considered recitation of intended use which is not given patentable weight.

As to claims 18-21, Farrell discloses structure necessary for performing the method steps cited in claims 15-21 (see structural limitation cited in claim 15). Therefore, it would have been obvious to one of ordinary skills in the art to perform the method steps of claims 15-21 using the device disclosed by Farrell.

Allowable Subject Matter

3. Claims 1,3,5,6,8-14 are allowed.
4. Claims 16-17,22-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
